

# Belle of the Ball Earrings

Written By: Project DIY

## INTRODUCTION

Learn how to make earrings and learn how to embellish them with adornments.

### TOOLS:

- flat pliers (1)

### PARTS:

- long filigree medallions (2)
- navette stones (2)
- resin rose beads (2)
- faux pearl cabochons (2)
- gold ear hooks (2)
- jump rings (3)
- E6000 glue (1)

## Step 1 — Belle of the Ball Earrings

### ● Step 1: Gathering Your Materials and Preparing your Jump Rings

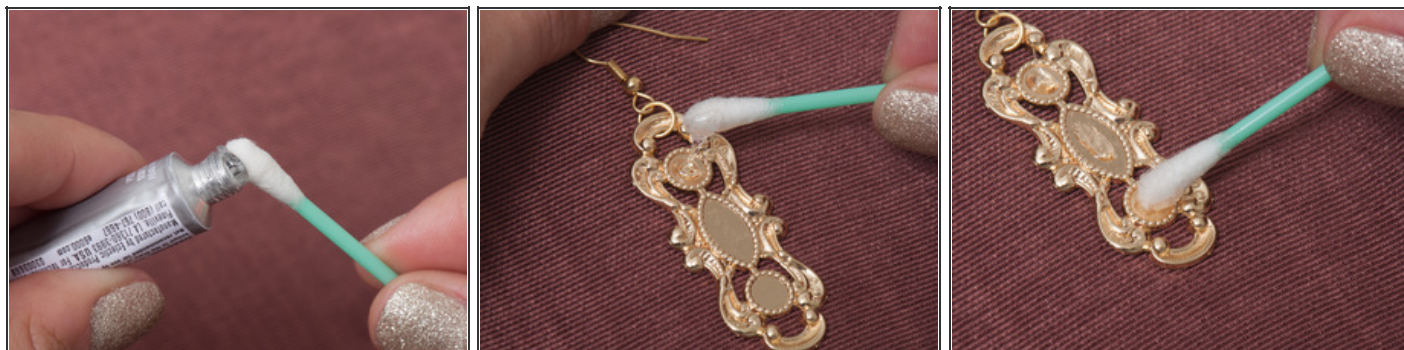

- To get started with your earrings, first use your flat pliers open two jump rings.
- **TIP:** First time using Jump Rings? Check out our 'How to Open & Close Jump Rings' tutorials in the Tips n' Tricks section!

## Step 2

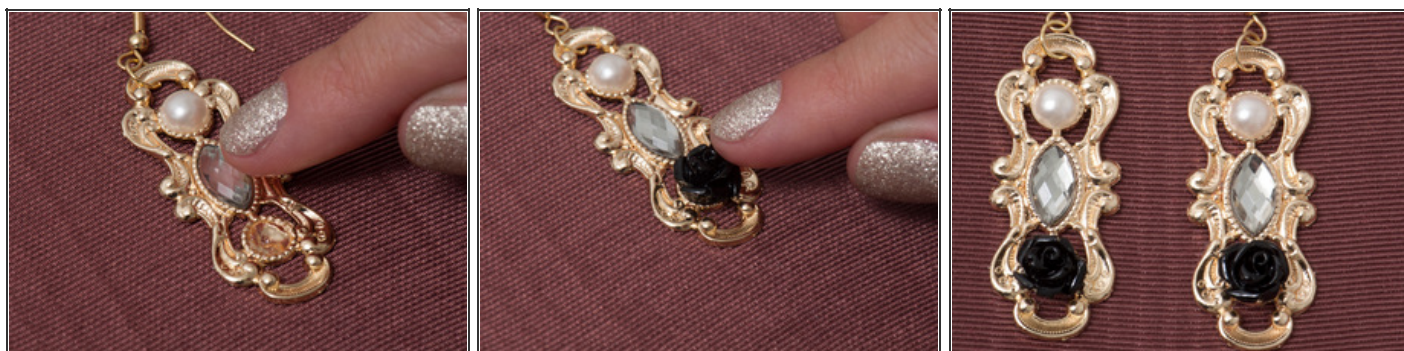

- Grasp one open jump ring with your flat plier and loop it through both the earring and the long filigree medallion.
- Close the jump ring.
- Repeat with the remaining earring.

### Step 3

- Lay both earrings on a clean, even surface.
- Using your E6000 glue (and a cotton swab if needed), place a small amount of glue into the three flat shapes on your filigree medallions.
- Let the glue sit for a minute before applying the decorative elements. This will allow the glue to become more tacky and adhere better to the trims!

### Step 4

- Starting from the top near the ear hook, gently press the trims into the glue in this order:
  - 1. Pearl Cabochon
  - 2. Navette Stone
  - 3. Resin Flower
- Press gently into place and let dry for 24 hours before wearing!
